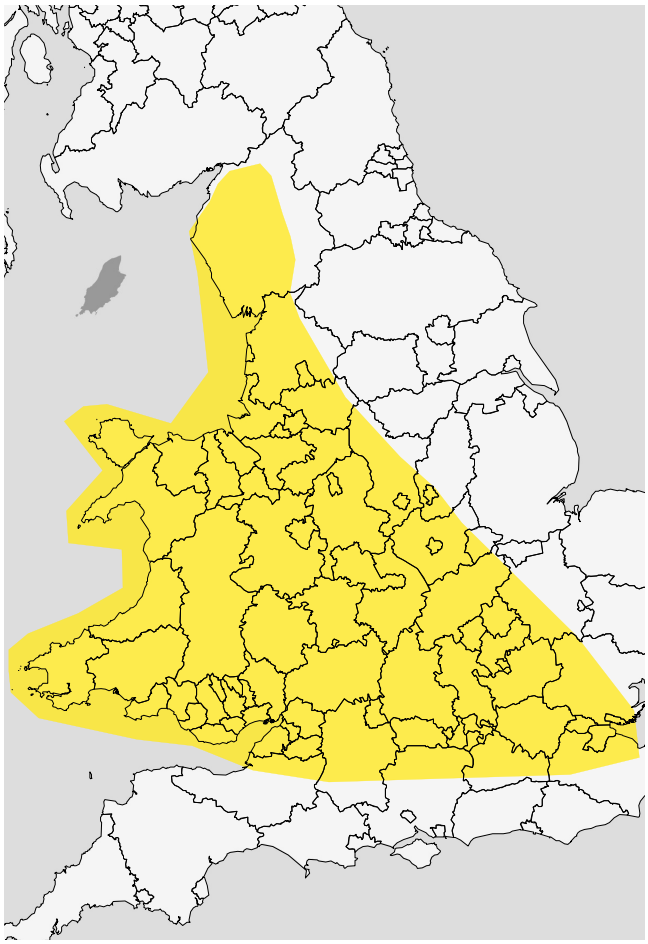
Yellow warning
Thunderstorm

Between
14:00 Sat 10 Jun 2023 and
22:30 Sat 10 Jun 2023



Whilst many places will be largely dry, thunderstorms with heavy rain and hail are likely to develop in some places on Saturday afternoon.

What to expect

- There is a small chance that homes and businesses could be flooded quickly, with damage to some buildings from floodwater, lightning strikes, hail or strong winds
- Spray and sudden flooding could lead to difficult driving conditions and some road closures
- Where flooding or lightning strikes occur, there is a chance of delays and possibly even cancellations to rail services
- There is a slight chance that power cuts could occur and other services to some homes and businesses could be temporarily lost

Further details

High temperatures across parts of England and Wales on Saturday are expected to trigger a scattering of showers and thunderstorms, perhaps with the focus towards the west of the warning area. Some of these storms could produce torrential downpours, bringing 30-40 mm in an hour, while one or two spots affected by multiple showers could see in excess of 60 mm across a few hours. Hail, strong gusts of wind, and lightning will be possible additional hazards.

Despite this, some places in the warning area will remain dry, or see little rain, due to the scattered nature of the heaviest showers.

✓ Very low likelihood of medium impacts
